

B<sup>2</sup> cont'd  
amine, amide, amine-oxide, fatty alcohol, fatty acid, alkyl phenol, and/or alkyl aryl carboxylic acid compounds, each having from about 6 to about 22 carbon atoms in an alkyl or alkylene chain, wherein at least one active hydrogen of said compound is ethoxylated with  $\leq 30$  ethylene oxide moieties to provide an HLB of from about 8 to about 20.

B<sup>3</sup>  
39. (Amended) The composition of Claim 1 wherein the phase stabilizer is derived from a C<sub>8</sub>-C<sub>18</sub> fatty alcohol ethoxylated with from about 5 to about 15 moles of ethylene oxide.

#### In the Specification

Please amend the specification by replacing the paragraph on page 28, beginning line 17 and ending line 26 with the following:

B<sup>4</sup>  
Preferred phase stabilizers are nonionic surfactants derived from saturated and/or unsaturated primary, secondary, and/or branched, amine, amide, amine-oxide, fatty alcohol, fatty acid, alkyl phenol, and/or alkyl aryl carboxylic acid compounds, each preferably having from about 6 to about 22, more preferably from about 8 to about 18, carbon atoms in a hydrophobic chain, more preferably an alkyl or alkylene chain, wherein at least one active hydrogen of said compounds is ethoxylated with  $\leq 50$ , preferably  $\leq 30$ , more preferably from about 5 to about 15, and even more preferably from about 8 to about 12, ethylene oxide moieties to provide an HLB of from about 8 to about 20, preferably from about 10 to about 18, and more preferably from about 11 to about 15.
